

In these days when the law has been approved on "Packet safety "it turns a wrong news in all the communities of present foreigners in Italy. We of the Regional Federation of the union of Base (RdB) in Naples, believe that IT'S useful to inform the present irregular foreign citizens on the territory, that they have interpreted badly the news coming from the Government. We have noticed a great flow of the community Pakistani and of that of the bangladesh toward three centers of the Post office in Rome, that accept the applications of the Residence permits. **The foreigners in this phase must not introduce the application of the Residence permit, because so doing they declare their personal data helping the police to know their addresses.** This law on the safety doesn't foresee a confirmation, that serves for regularizing the irregular foreigners but it is, instead, a racist law that damages both the irregular foreigners and those regular. The counter immigration of the RdB wants to give precise information on every point of the safety packet to help the immigrated to check their situation of permanence on the Italian territory.

Here, in synthesis, thing foresees on the front immigration the text that arrives in side today:
